

AWS CCP Project

Oakline Market Infrastructure

Prepared By: Susan Orire

Project Overview

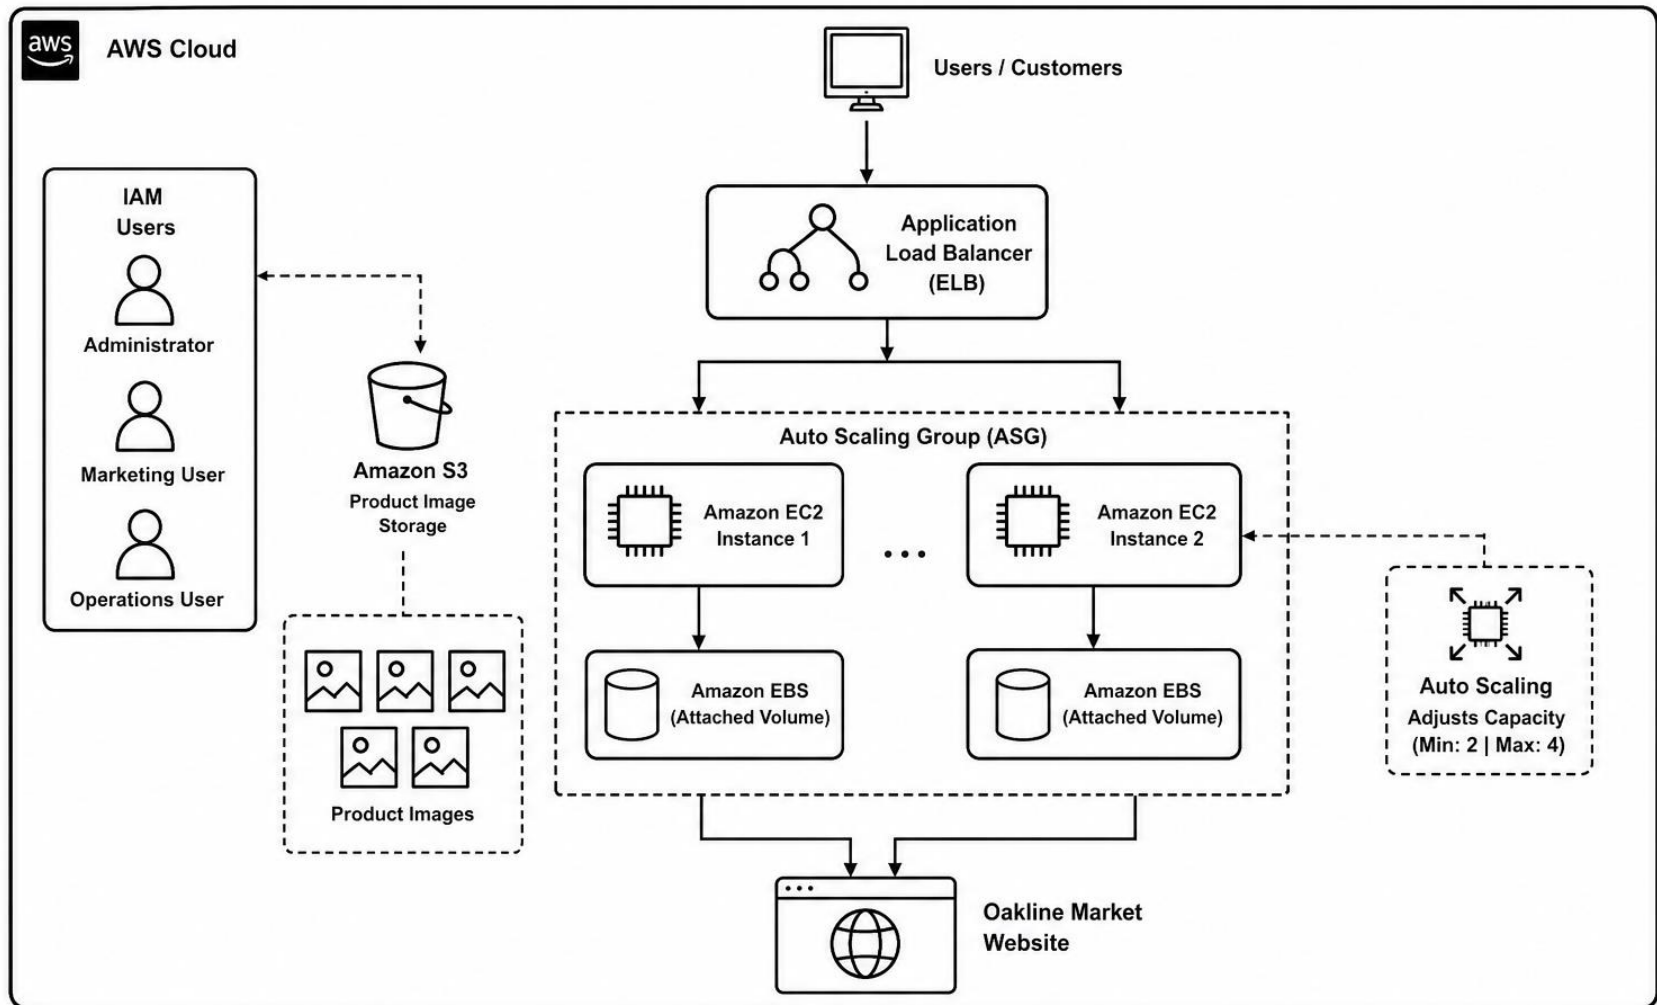

- Secure and scalable cloud infrastructure for Oakline Market
- Website hosting, image storage, and user management
- High availability and auto scaling enabled

AWS Services Used

- IAM - Access management
- S3 - Product image storage
- EC2 - Web hosting
- EBS - Persistent storage
- ELB - Load balancing
- Auto Scaling Group - Scaling resources

Architecture Diagram

Oakline Market – AWS Infrastructure Architecture

Security (IAM) & Storage (S3)

- Created Administrator, Marketing, Operations users and groups
- Applied least privilege access
- S3 bucket used for product images storage

EC2 & EBS

- Hosted website on Linux EC2 instance
- Installed Apache web server
- EBS used for persistent storage

Load Balancer & Auto Scaling

- ELB distributes traffic across EC2 instances
- Auto Scaling maintains 2–4 instances
- Ensures high availability and scalability

Conclusion

- Secure and scalable AWS architecture implemented
- Improved availability and performance
- Hands-on experience with core AWS services
